

## ScanDir Version 1.3.2

Use ScanDir to find files on your computer based on multiple selection criteria. The results of the Scan operation are shown in an item-list. The contents of the item-list can be printed or exported to a text file. Files in the item-list can be Viewed, Opened, Renamed, Deleted, Moved, Copied, Joined, Split or Printed. Select Help on the main menu or press F1 for more information.

## Pre-requisites

ScanDir 1.3.2 has been tested with Windows 10, 7 and XP.

## Installation

**windows installer:** run scandir132\_install.exe;

Depending on your Windows version, the 32-bit or 64-bit version of ScanDir will be installed.

scandir132\_install.exe may generate additional warning messages, see Online Help:

<http://www.skybird.net/ScanDir/Help/>.

**portable format:** extract files scandir132.zip;

scandir132.zip contains both 32-bit and 64-bit executables of ScanDir. The 64-bit version requires a 64-bit Windows operating system.

The 32-bit version of ScanDir runs on Windows 32-bit and 64-bit operating systems.

- ScanDir.exe
- ScanDir64.exe
- scnadir.chm
- EULA.txt
- ReleaseNotes.txt
- readme.txt
