Click the '+' sign in the Contents window on the left to expand this topic and select a sub-topic for more information.

## Date and Time format

### Date:

ScanDir uses the windows (short) date format. Use windows (Windows | Settings | Time & Language) to modify the date format.

### Time:

ScanDir uses the windows time format. Use windows (Windows | Settings | Time & Language) to modify the time format.

## Scandir.ini

ScanDir does not use the Windows registry but instead it uses an *.ini file*. This enables to run ScanDir from an USB device.

### USB device

To run ScanDir from a USB device, copy the following files:

- scandir.exe (scandir64.exe)
- scandir.ini ( optional, but recommended )
- scandir.chm ( optional, Help file)

### How ScanDir processes .ini files

When ScanDir is started, it will look for an *.ini file* in the start-up folder. If found, ScanDir will use this *.ini file*. If no *.ini file* is found in the start-up directory, ScanDir will look for an *.ini file* in the *Local Windows AppData folder*. If an *.ini file* is found here. ScanDir will use it.

If Scandir did not find any *.ini file* at all, it will create one (unless commandline option **-i** is used) in the *Local Windows AppData folder*.

The name of the *.ini file* is **scandir.ini** for 32-bit operating systems and **scandir64.ini** for 64-bit operating systems.

## Messages

**xxxx items found, continue?**

The maximum number of items ( Configuration | Advanced | Item limit ) was reached. Reply **Yes** to continue scanning or **No** to stop.

#### Delete xxxxxxxx ?

One or more items were selected for Delete and Confirm Delete is set to Yes. Reply **Yes** to delete xxxxxxxx, **Yes to All** to delete all selected items, **No** to skip only xxxxxxxx or **Cancel** to skip all selected items. Use Options or Configuration to set Confirm to No.

#### Purge xxxxxxxx ?

One or more items were selected for Purge and Confirm Purge is set to Yes. Reply **Yes** to purge xxxxxxxx, **Yes to All** to purge all selected items, **No** to skip only xxxxxxxx or **Cancel** to skip all selected items. Use Options or Configuration to set Confirm to No.

#### Rename xxxxxxxx to yyyyyyyy?
